

Exhibitor Center

If you are an exhibitor participating in electronica China, our Exhibitor Center allows you to place orders for services to prepare for the fair and publish information about your company online.

The Exhibitor Center is an online platform that allows you to apply for exhibitor badges, submit your entries for the fair catalog, send electronic invitations to your customers, order trade-visitor invitations, nominate customers as VIPs, etc.

In addition, you can also upload and edit all your company information, including company logo, company profile, product presentations, press releases and so on.

The information that you submit will be used for printed materials, show previews, e-mails, and on the fair's official website.

The exhibitors of electronica China will receive an email with their individual user name and password for the registration in the Online Exhibitor Center.
